Boys' Suits for Confirmation. Do you want your boy to look nice for the confirmation service? We have in Belleville, have a complete assortment of blue serge and black suits in all sizes and prices. See that the boy looks nice. It costs you little and the suits are useful. Remember Oak Hall for boys confirmation suits.

Kingston will observe June 15th as decoration day.

A Kingston gardener showed new pots on Saturday.

The syndicate of Ontario will meet at Kingston on June 15th.

John Fisher, grocer-man, Kingston, dropped dead on Saturday morning from heart disease while attending to his business.

The company of Kingston, has contracted for 6000 tons of soft coal to be brought from Scotland. The first consignment has arrived at Gardner's Island. The company is getting coal ready.

On Tuesday night 24th, Mrs. A. large barn at Plainfield, owned by Mr. John Gillaspie, and in which were stored a large number of sleighs, ciders and other articles, took fire and was totally consumed, with all its contents. Loss and insurance not learned.

A number of cases and boxes have been discovered in New York City. Some cases have also been found in Detroit in several places in Michigan. It has been reported in Chicago for some time. Every effort is being made to prevent its spread to Canada.

A terrific hail storm passed over the north east portion of the County of Oxford on Saturday, causing considerable damage to the crops and causing a number of wrecks on the railway. At Tavistock, twelve miles north of Woodstock, hail fell to the depth of two feet, and in some places was piled up in huge banks.

One-Price Only.

In a store that has different prices, the customer is the customer's only. But in a one price house the customer is king. In a two price house they are seeing more than one can get, whereas a one-price house is ensuring that you see how else they can sell. The Oak Hall Belleville is the only positively one-price clothing house in the city. Don't forget this.

Only a Step  
from Weak Lungs to Consumption, from Depleted Blood to Anæmia, from Disease to Scrofula, from Loss of Flesh to Illness.

Scott's Emulsion

The Cream of Cod-liver Oil, prevents this step from being taken and restores Health. Physicians, the world over, endorse it.

Don't be deceived by Substitutes! Books & Boxes, Belleville. All Druggists, Rec'd & Bl.

HOME MATTERS.

Mr. H. Harris has built a new veranda in front of his shop.

The Workmen's Lodge of this village will have a grand demonstration.

Mr. G. W. Walker, dentist, Belleville, visits Stirling the first and second Tuesday in every month. Rooms in Stirling House.

Decoration day in connection with Stirling No. 239, I.O.O.F., will be held at 8 o'clock in the evening on Wednesday, the 20th June.

John N. Larier and S. G. Faulkner, representing the Manufacturers and North American Life Insurance Companies, will speak at the meeting.

It has been estimated that our village beneficiary societies and policy holders in old line companies, send each year the sum of nearly five thousand dollars for Life Insurance.

In the absence of the Pastor, Rev. J. M. Gray, the pulpit of St. Andrew's Church will be occupied next Sabbath, morning and evening, by a divinity student of Queen's College, Kingston.

Rev. L. C. Stephenson, late curate at Stirling, has been appointed to the mission of Stirling, relieving Rev. W. H. Smyth, who has had temporary charge for some time.

Pursuant to notice to the Board of Directors, held its first sitting on the 28th instant, it was voted to meet again at 8 o'clock, p.m. on Monday, June 11th. There were no appeals.

A pea vine showing a growth of eighteen inches was exhibited on Monday. It was picked from a field just north of the village, and was measured, and found to be 18 inches. The whole field is said to show equally good growth.

For the information of many in this section, we state that pneumonia and influenza of the lungs are the same thing, and physician's names for it have not been more prevalent during the last few months than was usual in past years.

The Queen's Birthday passed off very quietly here. About 500 from this place and surrounding country went to the Rapids to fish, but there were more fisherman than the weather was showery and disagreeable, for though the weather cleared, it was still raining.

The weather was starting vegetation running at a great rate.

Our postmaster picked a ripe strawberry in his garden last week. It was a fair size and good flavor. Who can beat that?

The farmers are doing considerable tile draining this spring, with advantage both to themselves, and the tile factory at Foxboro.

There is not much election excitement here yet.

Chatterton Chips.

From Our Own Correspondent.

A quiet place, we have had considerable excitement the last week. Among other events of a startling nature, there was a runaway and bad mishap, and an attempt at stabbing, although there was no one seriously hurt in either case.

The weather was showery and disagreeable, for though the weather cleared, it was still raining.

HOME MATTERS.

W. R. Warren and Harry Hagerman left on Tuesday morning for Toronto, and expect to return at the end of the week.

Geo. W. WALKER, Dentist, Belleville, in visiting the city and staying at the Royal Victoria Hotel.

Mr. Mack of W. W. Conner's, left

on Thursday morning for Wisconsin, on a visit to his children, who live there.

Mr. John Ralph has torn down the old frame house west of Mrs. George Lagoon, making an improvement to that part of Front Street.

A change has been made in the time of holding the militia camps, and the volunteers will not likely be called out to drill.

Mr. Turner last week added to his herd of improved swine two thoroughbred

Poland Chitt hog, a sow in farrow and a boar, both nine months old. See his ad.

Mr. E. A. Jewell, and Rev. Jas. Macfarlane left on Wednesday morning to attend Conference at Peterborough. Mr. B. Bush, lay delegate from Stirling circuit, went on Thursday morning.

Mr. G. E. Kingston, Barrister, of Toronto, who is now in Belleville, has been

allowed to call at Miss. Bessie M. Conner, daughter of Mr. R. D. Conner, of that city. The News-Anus extend congratulations.

A social will be held in the basement of the Presbyterian church, on Friday evening, June 26. A good program is being prepared. Also, refreshments will be provided by the ladies. Everybody will be welcome. Admission, 15 and 20cts.

Rev. J. M. Gray will preach in the Methodist church on Saturday evening, and in the Presbyterian church on Sunday evening.

There will be no service in the Presbyterian Church in the morning, nor in the Methodist Church in the evening.

Mr. and Mrs. John Lanyon have

arrived in Stirling and are staying at the Coupland Block, Front St., Stirling, and is prepared to manufacture all kinds of Boots and Shoes, to order. Repairing, neatly done and at present prices.

We are pleased to inform the farmers of this part of Canada that the efforts of the government are being increased attention to stock raising. Edmund Caverley has just added a pair of Poland China pigs to his herd of Berkshires. Pork raising is much more profitable than grain at present prices.

Gold and wet weather which has

vailed in this part of Canada for some time past has also extended to the states south, New York and other states feeling its effects as much as Ontario. The weather of the night when the frost was observed, an occurrence utterly unknown before in June.

Mr. David Eggleton, lot 3, Con. 1, town of Rawdon has a cow which last week gave birth to three calves, all of them smart and healthy. The weight of the first of these calves was 150 lbs. Two years ago the same cow gave birth to three calves, and last year one, so that within two years she has had seven calves.

Toronto farmer states that many new lawns are being laid out in Ontario by the result of the recent rainfall.

and that they have been "lost upon the citizens of this Province."

An equal or greater number of Manitoba are also recently laid out so that the lawn professionals are getting pretty well crowded.

Personally, he is kindly, genial and affable, and I am sincerely pleased to be able to commend him as a gentleman worthily of encouragement. Very truly yours,

T. C. SOMERVILLE,  
To Jas. Boldrick, Esq., Stirling.

DOLLARS  
AND  
SENSE.

W. A. LINDSEY, a man is spent in

cleaning, washing and clothing of any kind, it will

show good sense, and by having goods cleaned at a reasonable price, will be one

half and look better all the time. Clothing and household goods of any kind can be

cleaned or dyed to a fine bright

color, and will be given to you

anyone who sees you. He is a man, and

will be right next week. Agency at R.

Parker's Drug Store.

They Want Name.

FRANK S. TAGGART & CO., 99 King Street West, Toronto, Ontario, desire the names

and addresses of a few people in every town

and city in Ontario, who would be willing to

secure them to offer to send name.

"Capit Guides the Boat," a superbly executed

color water picture, size 12 x 18 inches,

is now on exhibition in the window of

W. A. Lindsey's, 3, St. James, Jas. Anderson; Workhouse, Jas. Macfarlane, Hastings, S. Sing; Thomasburg, R. Duke, M. G. W. Dewey.

Theatre, music, entertainment given by the "Lipstick" girls, in the basement of the Methodist Church, on Tuesday evening was a most successful one in every respect. With the exception of two pieces of music, the program was formed by the little folks, the whole entertainment was pronounced by the large audience present as exceedingly good. Master Arthur and his distinct voice, and performed with great success.

They want name.

# THE DEAN AND HIS DAUGHTER.

## CHAPTER XL

Things went on in this way for several weeks, it may very well have been six or seven or even more; I will not really undertake to say. I know, however, that I had heard from Sir Henry several times, with his clerks at his disposal, his tendency to give up his wife, and I actually believe that, in the several letters he sent me were rough drafts of stanzas afterwards toned down, mollified and varnished for the Foreign Office.

I used to read them, having nothing much else to do, and dutifully to acknowledge them and answer any questions they might contain. And in a dull methodical kind of way I folded them up and docketed them, and put them away in a dispatch-box. This was the only responsibility which my marriage at this time entailed upon me.

Mrs. Fortescue still stopped on, and however intention of going. She remained one of those funny little animals which you see at the Aquarium—the hermit crab.

Mr. Hermit Crab was powerful claws, and a well-armed chest, but the remainder of his body is hopelessly soft and unprotected. So he fixes himself, tail first, into some convenient shell—usually that of a deceased whelk, hiding his defenceless portion within it, and boldly thrusting his mailed half out at the door. When he is tired of his position he can easily get out again, if he sees a smaller hermit than himself with a more comfortable home, he promptly hags him out of it and takes possession himself. This was Mrs. Fortescue all over.

At present she had a shell, that suited her. But she was ready day to change it for a better. She had not even the common industry of the spider which constructs its own web, or the caddis worm which builds its own house.

But on the other hand she was distinctly amusing, and in many ways very useful. She was a parasite, no doubt, but one of those parasites that give no annoyance. On the contrary, she always had some happy suggestion as to how the day ought to be spent. She took all the trouble of house-keeping off my hands. She could guess my humors, and new to a nicely when to speak, and when to keep a tranquil and golden silence.

And I think I may honestly say, that in my case, the rate, she was exempt from flattery, which is the besetting weakness of parasites. In truth, she was frank, and would even take me to task with such justice that it was impossible to be angry, and with such geniality and humor that it was equally impossible not to be amused.

In fact, I really believe that she had found me useful at the outset, and had ended by liking me as it was her nature to like anybody.

Mrs. Sabine soon became a regular visitor. There was no yachting at Brighton, he explained, because it was a shore, and harbors. The Brighton Harriers were beneath contempt, the thing was a gallop from first to last, with no hunting in it, and if there was a check for more than ten seconds, the hounds were lifted. It was no more hunting than circling riding in horsemanship.

For himself, he had long ago come to the conclusion that one of the greatest pleasures in life is to do nothing in your way and at your own time. And he thus found sufficient occupation.

When Mrs. Fortescue pressed him as to how he dealt with the "upheaval" of life, and begged him with much courtesy to teach her his infallible secret of perpetual youth and spirits, he answered cheerfully that he feared the methods which he employed were beyond the reach of any teacher.

However, he did not mean to commence the day with a plunge into the sea from the bathing station under the end of the pier; then he allowed the weather to get him. Sometimes he would play tennis; at others he would go for a walk, and when he had others walk or ride on the down.

Sometimes he would drive tandem, a secret, he added, which not even Americans had ever mastered, although the English gentlemen were our equals in most things, and our betters in a not a few.

Uricot, tankards, and tennis: were all peculiar to English. They required nerve, health, high animal spirits, considerable patience and practice; and it was for this reason that he was so fond of them.

Of course Mrs. Fortescue had nothing to say in reply.

The least approach to common-sense was sufficient to teach Mrs. Sabine that the strongest common-sense with a humor which, as he pleased, could be either genial or exasperating. Mrs. Fortescue certainly did not lack either of these qualities.

Some few days later I was out alone, Mrs. Fortescue had got what she called a sick headache. I turned to the Parc and was led along by the way to the Parade. Hove, when I recognized a spot which would hide me, and the next moment Mr. Sabine was at my side.

I was more than usually disposed to weep, come him, for I was irritated out of measure with the Dean, with my husband and I might almost say with the world generally.

Mrs. Sabine seemed to divine this, and almost majestically accommodated himself to my humor.

I remained to his wife, and the two hours almost as last as a calf limbered with white alms and a white blaze on his chest.

I inquired about the monster, and Mr. Sabine told me that it was a bear from the forests of Siberia, and that he had obtained it through the Russian Ambassador at Paris.

"Look at him," he said, as high in play, and half by way of reminder towards good humor, he gave the brute a gentle kick in the ribs, "he will tackle you." Russian bear almost as big as a man, as a horse, and enjoy the business into the bargain: this is as for a man unarmed, he would tear his throat in a moment."

"A sort of an animal to take about," he replied.

"I have been warned once or twice," he replied, "it was dangerous to have him around." "See," obeyed me don't you, Serge?"

And Serge, looking his name in the international, looked up with an ugly kind of growl, favored by his talk, in odes of the gesture shrank to his bed, and slouched along behind us. His manner in such a fashion was so distinctly belligerent as to almost make one feel uneasy.

Precisely, I cannot tell how, I found Mr. Sabine talking to me in a low tone, but stern and rather pale. I knew that I could not tell him, and the next, to seek any refuge, to escape from him under any pretext. And yet I listened and let him talk.

I had read before then how the serpent fascinated its prey, and how the snake charmer in his own turn asserts the ultimate superiority of man of fascinating the ser-

pent. None who has ever been in the past doubts for a moment that certain Hindoo possess this particular skill. Just as I had heard from Sir Henry several times, with his clerks at his disposal, his tendency to give up his wife, and I actually believe that, in the several letters he sent me were rough drafts of stanzas afterwards toned down, mollified and varnished for the Foreign Office.

I used to read them, having nothing much else to do, and dutifully to acknowledge them and answer any questions they might contain. ## CHAPTER XII

One afternoon, about a fortnight later, I was in the drawing-room, reading. It was a dull day, and I was near the fire, which turned out upon the great chimney-piece, and the stars through great beds of water-lilies, the stars hung down from heaven, as if you could reach out your hand and pluck them. I was in a drowsy mood, and when I closed my eyes, I saw over me the sound of dice far-off music, and my tired eyelids closed on my tired eyes.

## Modern Bridges and Stiles.

During the past ten years there has been a great improvement in the construction of small bridges and stiles, especially as regards efficacy and durability.

For a device for fastening windows, and still leaving them open two or three inches, has been invented in England. Before this time the hair was held in place by little wooden skewers.

Powdered charcoal, if laid thick on a window, will prevent a burglar's breaking in.

# THE DEAN AND HIS DAUGHTER

## CHAPTER XIV (CONTINUED.)

I could read the verdict of the jury in the lawyer's face, but he believed it for himself and his companions. They found that I had been guilty of adultery with Mr. Sabine on various occasions, and more particularly on that when I had visited the yacht. And the judge, without any comment, gave effect to their finding in what Mr. Wylie told me were the usual terms.

He felt stung, and just remembered Mr. Wylie, and my arm, and leading me out of Court.

Here I was a drowsy woman, ruined and disgraced for ever, a thing to be shunned and avoided as if plague-stricken, and yet, as I shall have to answer for it in the last day, and in a Court where all hearts are open, as absolutely and wholly innocent of the foul charge brought against me as a child could be.

I only just remember being helped into my brougham and driven rapidly back with Mrs. Fortescue to the Stockwell Street. The next morning I awoke, having waked up as from a long sleep and seeing that the sun was darkened and that there were indistinct bathtubs about, and that Mrs. Fortescue was assisted by my bedside.

"Now, you are to be perfectly quiet, dearest child," said she; "and you are not even to talk to me. If you do, I shall have to leave you and hand you over to a hospital nurse, which I'm sure you wouldn't like. So lie still and keep quiet."

I smiled languidly and tried to sit up in bed, but found I had not the strength. Mrs. Fortescue, however, managed to prop me up with pillows. Then she sponged my face and hands with *l'eau de Cologne* and water, and gently curled my hair, which I noticed had been cut to about a third of its length.

Then she gave me a glass of champagne and said,

"This is what you have been living on, my sweet, for nearly a fortnight," she said, "and now you must lie down again."

Just as drowsily as a child, I did exactly as she told me, and lay for some time, as I lay in bed, looking at the patterns of the wall-paper and counting the tassels on the fringes of the bed hangings.

Then a stout tall man who felt my pulse said,

"You will soon be able to be moved," he said. "I think we must send you to Torquay, or, at any rate, somewhere south. We will tell the world you are kept quiet, and you must drink champagne."

Mrs. Fortescue here tells you to do so. We all want to get you away from here and to see the doctor in your cheeks. But we can't do that until you are strong enough to be moved."

I must indeed have been terribly weak, for this pretty little speech seemed almost as if it had been dictated to me by the judge himself. I quite tried me out. I remember Mrs. Fortescue handing me a bunch of violets, which I snelt, and then kept in my pocket, as a remembrance from Miss Maudie, who said, "wherever you go, in the winter, if you will only do as you are told, and get strong again. As soon as you are well, we will leave you to the sea, and we will bring back the ring."

Then she sat down and took up a book, nodded at me kindly over the top of it, and began to read, and pretended to read, with a smiling face.

I was now sufficiently recovered to realize that I was indeed far weaker than I had supposed. So I allowed my eyes to close dreamily, and from weakness, for it could not be weariness, I fell asleep.

I found afterwards, when I was not then known, that they had saved my life by morphine, which had been actually forced into my veins by a tiny little syringe with a pump no larger than a pin.

I found also that for some days my life had been despaired of; that Mrs. Fortescue had never left my bedside that Mr. Sabine had not been at my side, and had not been every day, and that the very Rev. Mr. Dean had left town for the Cathedral Cloisters on the evening of the trial, and that Mr. Sabine, after his arraignment, was not appearing before the court, in the despatch which his voice was frequently choked with emotion, while the eligible widows and sisters, who had been the butt of the congregation, sobbed helplessly.

The sermon was afterwards printed by special request, and my father had actually the assurance to send a copy of it to myself and another to Mrs. Fortescue, with his own signature and a postscript on the title page.

Forrescue, "which before he got his deancy, the smallest alehouse in England would not have touched with a pair of fingers."

And I could not help laughing, for I knew that, when we were living at Boscombe, my father was perpetually writing to advertising, money-lenders, who never so much as condescended to even answer his epistles.

## CHAPTER XV.

We found Torquay a place perfectly intolerable, filled with rich parvenues, and oppressive with its glare of stucco. We were told that the pleasantest island, Totnes, among others, was a ghost, and the main suburb of Torquay, which had been mentioned. Then glowing descriptions were given us of the magnificence of the Dard and the Tiber, and the magnificence of the Danube, which the Danube was frequently shocked with emotion, while the eligible widows and sisters, who had been the butt of the congregation, sobbed helplessly.

The sermon was afterwards printed by special request, and my father had actually the assurance to send a copy of it to myself and another to Mrs. Fortescue, with his own signature and a postscript on the title page.

Forrescue, "which before he got his deancy, the smallest alehouse in England would not have touched with a pair of fingers."

And I could not help laughing, for I knew that, when we were living at Boscombe, my father was perpetually writing to advertising, money-lenders, who never so much as condescended to even answer his epistles.

And so our days passed pleasantly enough. We lived, as Mrs. Fortescue declared, like duchesses, except in the little house, which we had to live in, and we lived for next to nothing.

"We're not saving money, my dear, we are saving," said Mrs. Fortescue.

"We were thinking, as she repeated this, that we had to economise, our house, which was devoted according to the season to roses, hollyhocks, mimosa, sweet peas, and almost every variety of garden produce."

Suddenly we became aware that Lydall had come to stay with us, and was making his way down to the Cove.

"It can't be the Plymouth boat, Miriam," said Mrs. Fortescue. "That doesn't come to-day. Come along, get your hat, and we'll go to the Cove. A steamer was perceptible straight for the narrow channel. As she grew nearer, we could see the white steam.

The solitary coastguardman suddenly offered us his glass, and handed his pipe to afford a convenient rest for those who were tired. The pipe and tobacco repose were but half true, had more than once served him in good stead as a useful and handy substitute for a constable's thumb.

Mrs. Fortescue took the first pipe, and we continued our conversation. He told us his glass, and his tobacco, and we sat on the deck, and I lay down to sleep.

"I'm not saving money, my dear," said Mrs. Fortescue.

"We were thinking, as she repeated this, that we had to economise, our house, which was devoted according to the season to roses, hollyhocks, mimosa, sweet peas, and almost every variety of garden produce."

Suddenly we became aware that Lydall had come to stay with us, and was making his way down to the Cove.

"It can't be the Plymouth boat, Miriam," said Mrs. Fortescue. "That doesn't come to-day. Come along, get your hat, and we'll go to the Cove. A steamer was perceptible straight for the narrow channel. As she grew nearer, we could see the white steam.

The solitary coastguardman suddenly offered us his glass, and handed his pipe to afford a convenient rest for those who were tired. The pipe and tobacco repose were but half true, had more than once served him in good stead as a useful and handy substitute for a constable's thumb.

Mrs. Fortescue took the first pipe, and we sat on the deck, and I lay down to sleep.

"I'm not saving money, my dear," said Mrs. Fortescue.

"We were thinking, as she repeated this, that we had to economise, our house, which was devoted according to the season to roses, hollyhocks, mimosa, sweet peas, and almost every variety of garden produce."

Suddenly we became aware that Lydall had come to stay with us, and was making his way down to the Cove.

"We were thinking, as she repeated this, that we had to economise, our house, which was devoted according to the season to roses, hollyhocks, mimosa, sweet peas, and almost every variety of garden produce."

Suddenly we became aware that Lydall had come to stay with us, and was making his way down to the Cove.

"It can't be the Plymouth boat, Miriam," said Mrs. Fortescue. "That doesn't come to-day. Come along, get your hat, and we'll go to the Cove. A steamer was perceptible straight for the narrow channel. As she grew nearer, we could see the white steam.

The solitary coastguardman suddenly offered us his glass, and handed his pipe to afford a convenient rest for those who were tired. The pipe and tobacco repose were but half true, had more than once served him in good stead as a useful and handy substitute for a constable's thumb.

Mrs. Fortescue took the first pipe, and we sat on the deck, and I lay down to sleep.

"I'm not saving money, my dear," said Mrs. Fortescue.
